# AJAX LAYERED NAVIGATION

## USER GUIDE

*Version 1.0.1*

Welcome to Ajax Layered Navigation Extension for Magento 2 developed by Sparsh.

This extension extends the Magento 2 layered navigation by allowing your customers to filter, sort and paginate your product catalog with AJAX technology without page refresh.

## KEY FEATURES:

- ❖ Enable/Disable from the backend
- ❖ Filter, Sort, and Paginate without page refresh
- ❖ Extend the Magento 2 layered navigation
- ❖ Enhance UX by Ajax technology
- ❖ Provide your users with a faster and more user friendly user experience
- ❖ Improve customer experience
- ❖ Allows filtered products to appear immediately after every single filtering action

## 1. HOW TO ENABLE AJAX LAYERED NAVIGATION

To use this extension, you first need to enable it from the backend.

Go to Magento 2 Admin > Login > Stores > Configuration > Sparsh Extensions > Ajax Layered Navigation.

Expand the **General Configuration** section, and do the following:

➢ **Enabled**: Select "Yes" to enable this extension.

Clear cache from System > Tools > Cache Management if required.
