

BUY NOW PRO

USER GUIDE

Version 1.0.0

Welcome to Buy Now Pro Extension for Magento 2 developed by Sparsh

This extension allows us to have a "Buy Now" button to directly go to the checkout page to speed up the checkout process and increase conversion rate on your Magento store. It will make the checkout process easy and as quick as possible, especially for customers who want to buy a particular product.

KEY FEATURES:

- ❖ Easy to use
- ❖ Make Checkout process easy
- ❖ Multi-Lingual support
- ❖ Create Buy Now button product wise

1. HOW TO CONFIGURE BUY NOW PRO EXTENSION

Go to [Magento 2 Admin] > Stores > Settings > Configuration > Sparsh Extensions > Buy Now Pro

To Enable Extension:

Expand the General Configuration and choose "Show Buy Now Button" as Yes.

Choose 'Yes' to enable extension. On disabling it "Buy Now" button won't be shown on frontend

Add default button title to show on frontend

After enabling the extension, you will find the following configuration:

- **Default Button Title:** Enter the button title. This title will be displayed on the storefront as label of Buy Now button when there is no specified button added for particular product.

Display a Sticky Bar Featuring Buy Now Button <small>[store view]</small>	No	To show sticky bar on product view page
Show Express Checkout Popup <small>[store view]</small>	No	To show express checkout popup on click of buy now button
Hide Add to Cart Button <small>[store view]</small>	Yes	You can choose to restrict the but now button to a specific page
Show on Catalog Page <small>[store view]</small>	Yes	
Show on Product Detail Page <small>[store view]</small>	Yes	If you want to allow the product in customer's cart to exist. then choose 'Yes'. On choosing 'No' all products in cart will be removed
Show on Search Result Page <small>[store view]</small>	Yes	
Show on Related Products List <small>[store view]</small>	Yes	
Show on Up-Sell Products List <small>[store view]</small>	Yes	
Show on Cross-Sell Products List <small>[store view]</small>	Yes	
Show on Wish List Page <small>[store view]</small>	Yes	
Show on Compare Products Page List <small>[store view]</small>	Yes	
Keep Products in Cart <small>[store view]</small>	Yes	

On choosing 'No', all existing products in the cart will be removed.

- **Display a Sticky Bar Featuring Buy Now Button :** Choose “Yes” if you want to show “Sticky bar” on product view page.

4. HOW TO SHOW IT ON DEFAULT WIDGET LIKE HOT SELLERS ON HOMEPAGE

To have it on Hot Sellers section on homepage, go to **Content > Elements > Blocks > Edit Home Page Block**

Click on “Show / Hide Editor” button and find the text as shown below

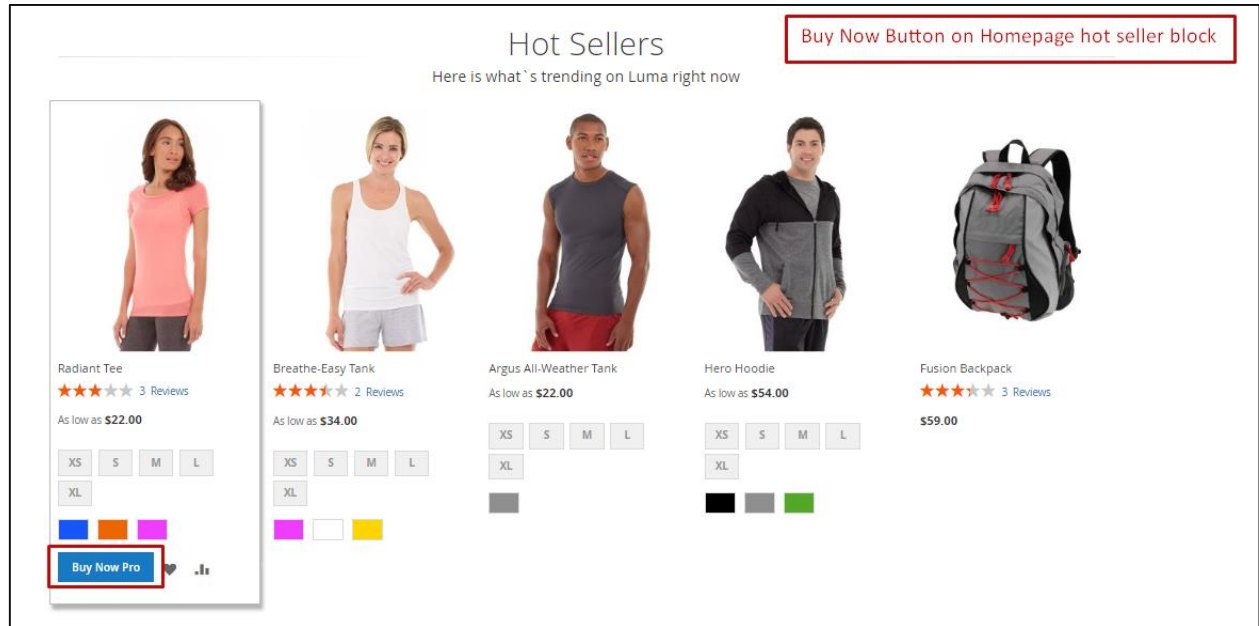

```
{{widget type="Magento\CatalogWidget\Block\Product\ProductsList"
products_per_page="8" products_count="8"
template="product/widget/content/grid.phtml"
conditions_encoded="^[`1`:^[`type`:`Magento||CatalogWidget||Model|
|Rule||Condition||Combine`,`aggregator`:`all`,`value`:`1`,`new_chi
ld`:``^],`1--
1`:^[`type`:`Magento||CatalogWidget||Model||Rule||Condition||Produ
ct`,`attribute`:`sku`,`operator`:`()`,`value`:`WS12, WT09, MT07,
MH07, 24-MB02, 24-WB04, 241-MB08, 240-LV05`^]`^"]}}
```

Replace the highlighted text/template with below:

```
template="Sparsh_BuyNowPro::catalog/product/widget/content/grid.ph
tml"
```

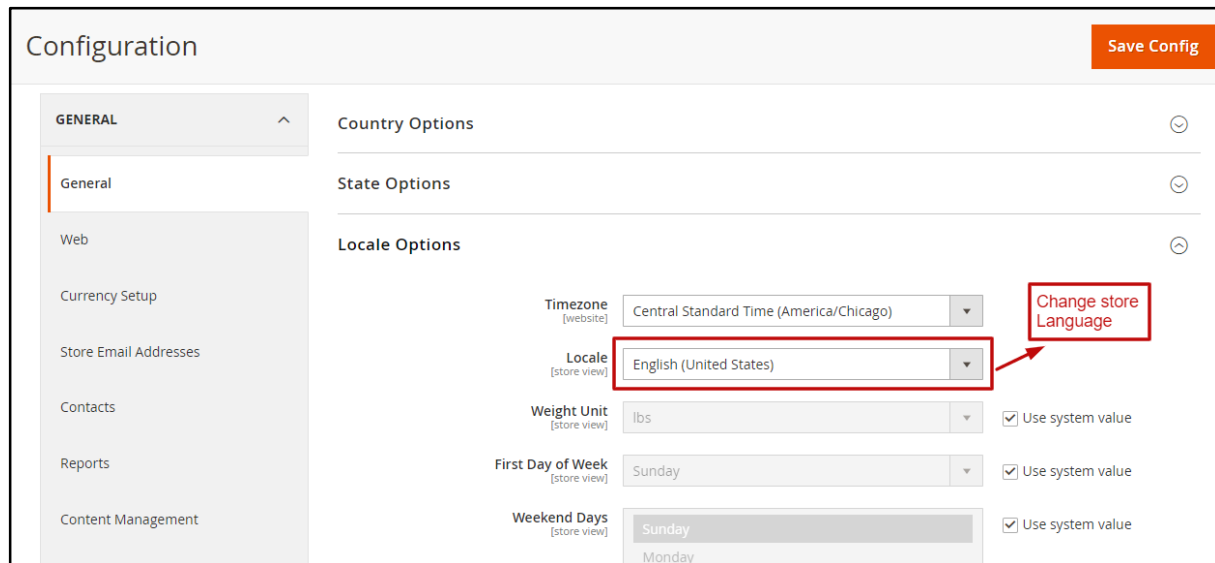

Save block and clear cache from **System > Tools > Cache Management**. Refresh homepage and check Hot Sellers section.

Note: Take a backup of block content once, considering the risk of design getting broken if you are not a technical person.

5. MULTI-LINGUAL CONFIGURATION

Magento 2 by default provides language configuration. Navigate through **Store > Configuration > General > Locale Options** to select your desired language from the **Locale** option as required.

After changing the language, please navigate to vendor/sparsh/BuyNowPro/i18n/ if you have installed extension using composer. Now, copy and paste the file en_US.csv in same folder(i18n) and rename the file to selected region language and country code such as (nl_NL.csv).

After creating the file, open the file and replace the word after comma(,) with your translated word. Do the same for all the labels mentioned in the file.

After that please clear the cache from System > Tools > Cache Management and reload page to reflect applied label changes in the backend module.
