USER GUIDE

Version 1.0.0

Welcome to Product Attachment Extension for Magento 2 developed by Sparsh.

We have provided this guide to understand better use of the extension. We have tried to explain the basic functionality required by every Magento store.

This extension is used to assign one attachment to more than one products directly which will be visible on front end on product detail page as in additional tab.

Every below steps helps to show product attachment on your site.

1. HOW TO UPLOAD AN ATTACHMENT TO PRODUCTS

Go to [Magento 2 Admin] > Login > Catalog > Product Attachment > Manage Product Attachment > Add New Attachment

Fill the form details to add a new attachment:

- **Title:** Title of the attachment which will be visible on frontend
- **Status:** Admin can set status as enabled or disabled according to requirements.
- **Sort Order:** Order to display attachments on front. E.g. 1, 2, 3 ... It will be displayed in ascending order.
- **Upload Attachment:** Attachment to display on product detail page. Allowed extensions : jpg , png , jpeg , jfif , gif , bmp , ods , doc , docx , xls , xlsx , pdf , csv , txt , rtf

Title: *

Status:
 You can keep adding attachment details by marking it as Disabled and once ready, change the Status to Enabled. The default value is Enabled.

Sort Order:

Position/Order to display attachments on product detail page. E.g. 0,1,2... It will be displayed in ascending order.

Upload Attachment:
 You can upload an attachment from local computer/network to display on product detail page.
