

PRODUCT LABEL

USER GUIDE

Version 1.0.0

Welcome to Product Label Extension for Magento 2 developed by Sparsh.

We have provided this guide to understand better use of the extension. We have tried to explain the basic functionality required by every Magento store.

This extension is used to highlight your products using different custom labels like "New", "Best Seller", "Most Popular", "Sale" etc...

Every below steps helps to show product label on your site.

1. HOW TO ADD NEW LABEL

Go to [Magento 2 Admin] > Login > Catalog > Inventory > Products

In order to add new label, choose the “edit” option in select dropdown of action column for related product.

Select "Edit" on any individual product that you want to apply the label on.

ID	Thumbnail	Name	Type	Attribute Set	SKU	Price	Quantity	Salable Quantity	Visibility	Status	Website	Is Featured	Cost	Action
41		Luma Analog Watch	Simple Product	Gear	24-WG09	\$43.00	100.0000	Default Stock: 100	Catalog, Search	Enabled	Main Website			Edit
42		Bolo Sport Watch	Simple Product	Gear	24-WG01	\$49.00	100.0000	Default Stock: 100	Catalog, Search	Enabled	Main Website			Edit

Find the section as shown in below screenshot to add a new label:

- **Product Label Type:** You can add label either by text or by uploading image. Choose “Add Label By Image” option if you want to upload label image. Choose “Add Label By Text” if you want to add text label.
- **Product Label Image:** Upload label image to be shown for given product. jpg, jpeg, gif and png files are allowed to be uploaded.
- **Product Label:** Enter text to be shown as product label.
- **Product Label Background Color:** Choose label box color using color picker.
- **Product Label Color:** Choose label color using color picker.
- **Product Label Shape:** Choose label box shape e.g. Rectangle or Oval.

The screenshot shows a configuration interface for product labels. It includes five toggle switches, each labeled with a feature name and '[global]' below it, and the word 'No' to the right of each switch. The features are: Performance Fabric, Erin Recommends, New, Sale, and Is Featured. Below these are two main sections: 'Product Label Type' with a dropdown menu currently showing 'Add Label By Image', and 'Product Label Image' with a 'Choose File' button and the text 'No file chosen'. Red boxes and arrows highlight these sections with explanatory text.

Performance Fabric [global] No

Erin Recommends [global] No

New [global] No

Sale [global] No

Is Featured [global] No

Product Label Type [global] Add Label By Image ▼

Product Label Image [global] Choose File No file chosen

You can add label either by text or by uploading an image. Choose "Add Label By Image" option if you want to upload label image.

Upload image to be shown as Label for given product.

2. HOW TO EDIT LABEL

Go to [Magento 2 Admin] > Login > Catalog > Inventory > Products

In order to edit label, choose the "edit" option in select dropdown of action column for related product.

The screenshot displays the configuration interface for Product Labels. It includes the following elements:

- Is Featured** [global]: A toggle switch set to "No".
- Product Label Type** [global]: A dropdown menu currently showing "Add Label By Text".
- Product Label** [global]: A text input field containing the word "Sale".
- Product Label Background Color** [global]: A color picker showing the hex code #a311a3.
- Product Label Color** [global]: A color picker showing the hex code #cfa3cf.
- Product Label Shape** [global]: A dropdown menu currently showing "Rectangle".

Four red callout boxes provide instructions:

- One points to the "Add Label By Text" dropdown: "You can add label either by text or by uploading an image. Choose 'Add Label By Text' option if you want to add text label."
- Another points to the "Sale" text input: "You can enter text to be shown as Product Label."
- A third points to the background and label color pickers: "You can choose label box color and label color using color picker from here."
- The fourth points to the "Rectangle" dropdown: "You can style the label box by choosing one of the shapes from Rectangle or Oval."

3. STORE FRONT VIEW

Clear cache from System > Tools > Cache Management if required.

By Default, Labels will be shown on Category page, Product detail page, Search result page and My wish list page.

4. HOW TO SHOW LABEL ON DEFAULT WIDGET LIKE HOT SELLERS ON HOMEPAGE

In order to show product labels on Hot Sellers section on homepage, go to [Magento 2 Admin] > Login > Content > Elements > Blocks > Edit Home Page Block

Click on “Show / Hide Editor” button and find the text as shown below.

```
<p>{{widget type="Magento\CatalogWidget\Block\Product\ProductsList"
products_per_page="8" products_count="8"
template="product/widget/content/grid.phtml"
conditions_encoded="^[`1`:^[`type`:`Magento||CatalogWidget||Model||Rule||Condition||Combine`,`aggregator`:`all`,`value`:`1`,`new_child`:``^],`1--
1`:^[`type`:`Magento||CatalogWidget||Model||Rule||Condition||Product`,`attribute`:`sku`,`operator`:`()`,`value`:`WS12, WT09, MT07, MH07, 24-MB02, 24-WB04,
241-MB08, 240-LV05``^]`^"]`}}</p>
```

Replace highlighted text / template with below:

```
template="Sparsh_ProductLabel::product/widget/content/grid.phtml"
```

Save block and clear cache from System > Tools > Cache Management.

Refresh homepage and check Hot Sellers section.

Product Label on default widget like Hot Sellers on Homepage.

Note: Take a backup of block content once, considering risk of design got broken somehow in case you are not technical person.

5. SHOW LABEL ON CUSTOM EXTENSION

To add product label on your custom page / extension, follow below steps.

→ Add product label helper on top of your template file as shown below

```
$productLabelHelper = $this-
>helper('Sparsh\ProductLabel\Helper\ProductLabelHelper');
```

→ Add code as below to display product label

Add below code where you want your product label “span” html tag to be shown for given template. Take help of designer if you are not sure where to put this in HTML.

```
$productLabelType = $productLabelHelper->getProductLabelType($_product);
if (!empty($productLabelType)) {
    if ($productLabelType == 'text') {
        $productLabel = $productLabelHelper->getProductLabel($_product);
        $productLabelColor = $productLabelHelper-
>getProductLabelColor($_product);
        $productLabelBackgroundColor = $productLabelHelper-
>getProductLabelBackgroundColor($_product);
        $productLabelShape = $productLabelHelper-
>getProductLabelShape($_product);
        if ($productLabel && $productLabelShape) { ?>
            <span class="sparsh-product-label"
                <?php echo !empty($productLabelColor) ? 'data-color=' .
$productLabelColor : ''; ?> <?php echo !empty($productLabelBackgroundColor) ?
'data-background-color=' . $productLabelBackgroundColor : ''; ?> <?php echo
!empty($productLabelShape) ? 'data-shape=' . $productLabelShape : '' ?>>
                <?php echo $block->escapeHtml($productLabel); ?>
            </span>
            <?php }
        } elseif ($productLabelType == 'image') {
            $productLabelImage = $productLabelHelper-
>getProductLabelImage($_product);
            if ($productLabelImage) { ?>
                <div class="sparsh-product-label-image">
                    
                </div>
            <?php }
        }
    }
}
```

Note: `$_product` is product object variable name. If you are having different variable name then replace it with your variable name.

→ Add jquery as shown below.

```
<script type="text/x-magento-init">
  {
    "*": {
      "Sparsh_ProductLabel/js/label-shape": {}
    }
  }
</script>
```
